

AIR DUCT INSULATION SLEEVE

SILVER JACKET

- Helps reduce heat / cool loss as well as condensation build-up
- Contains a black polyethylene jacket
- Ideal for insulating existing rigid or semi-rigid round ducts
- Heavy duty vapor barrier
- Glass fiber insulation is fire retardant

R 6.0

Product Code	UPC Code	Size	Packaging	Pack Qty.	Pack Wt. (lbs)

JA-0810-1	058680005877	8" X 10'	Standard Carton	5	16.17

Code Compliance:

Dundas Jafine recommends that you check with the local code body, having jurisdiction in your area, to determine applicable codes. Many local building codes now dictate that any warm air ducting, passing through an open or unheated space, must be insulated.

R Factors: 4.2/6.0 (R-Values valid if sleeve is used on a duct equivalent in size)

Vapor Barrier Permeability: 0.17 perms (Based on O.D. of 12" diameter duct at 75°F mean temperature and actual heat loss/Lin. Ft., per ADC FD72-R1)
